

ABOUT ME

I am a passionate front-end designer with experience in creating intuitive and visually appealing user interfaces. My focus is on combining aesthetic design with functionality, ensuring a smooth and enjoyable user experience. I have expertise in using modern technologies such as HTML, CSS, JavaScript, and frameworks like React and Flutter. I am eager to bring my skills to a dynamic team where I can contribute to impactful projects and continue to develop my professional abilities.

- Canva, figma

Miguel Ángel Arenas Quintana

Software Development and
Management Student
Front-End Developer

Work Experience

Web Project | Repository System of Thesis and Stay Reports for the Universidad Tecnológica de Escuinapa Project to Obtain a Technical Degree

- Development of a website to display thesis and reports of stays of students of the Universidad Tecnológica de Escuinapa

Lenguaje Center for the Technological University of Escuinapa

- This project involves a platform for individuals interested in the university's English course to take a placement exam within the course. The exam places participants in a course level based on their responses. The platform also includes an administrator mode for reviewing all aspects related to exam questions, registrants, and their responses.

Web Project | Guess the Song Final semester project (January - April | 2024)

- Development of a website for a game that includes a mode with five categories based on the year.
- Implementation of an admin panel for managing the category module.
- Design and development of the database and web design.

Database Proposal for a Digital Music Service Like a Spotify

Design and development of a database for a Digital Music Service.
Creation of tables and relationships.

Database Proposal for a Bank

Design and development of a database for a bank.
Creation of tables and relationships.
